

One-Point Perspective!

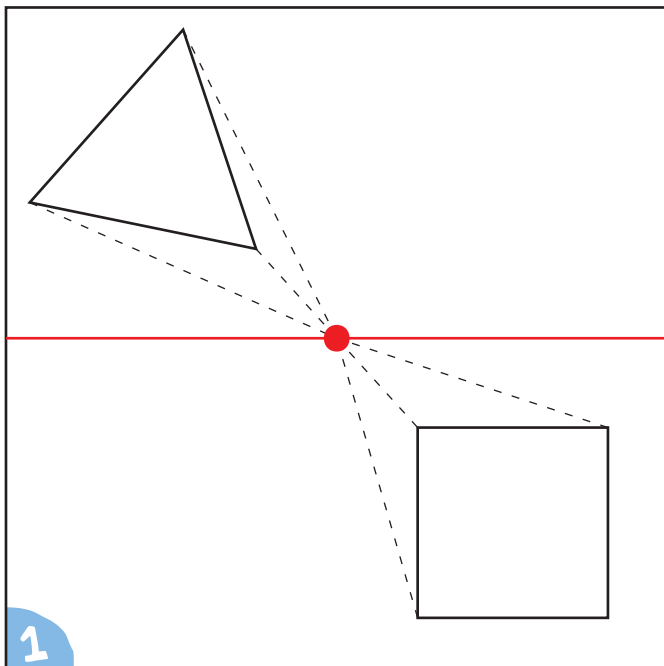

In one-point perspective drawing, you use a horizon line and a vanishing point to align your objects too.

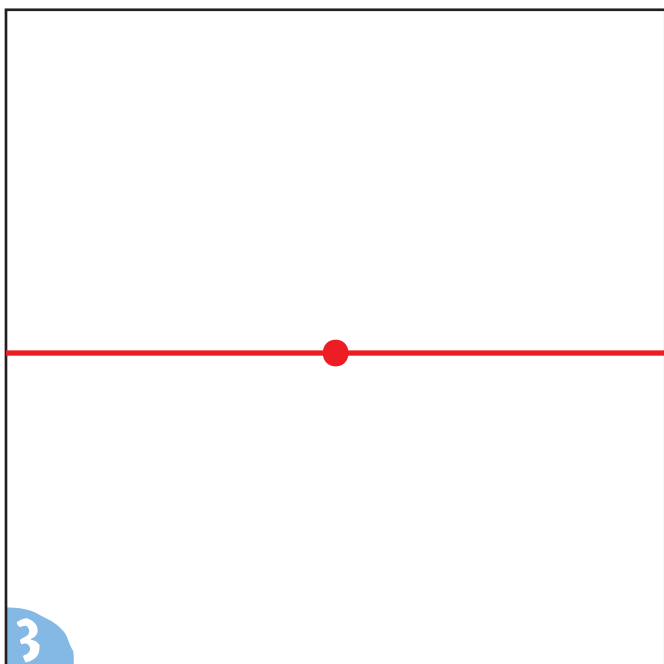

Any object that is positioned **above** the horizon line, are drawn as if you are **looking up** at it.

Any objects position **below** the horizon line, are drawn as if you are **looking down** on it.

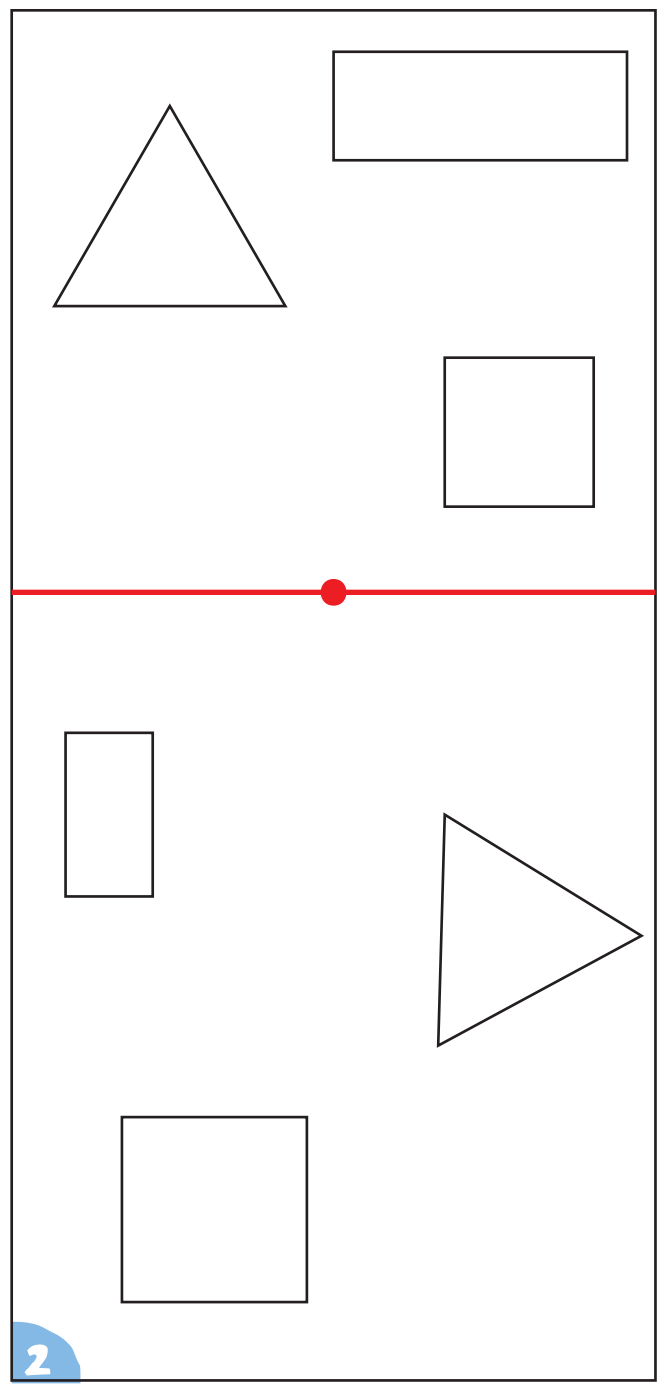

You will need a ruler, pencil and crayons

Trace the dotted lines and connect the shapes to the vanishing point

Draw and connect your own shapes to the vanishing point.
For an advanced option, try writing your name!

Using a ruler, connect the shapes to the vanishing point and colour in!
